## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 13 recites the limitation "said regional image". There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 3-9, and 11-13, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Steensma in view of Anderson, USPN 6,249,316.

With regard to claims 1, 5, 9, and 12, Steensma discloses a system for managing photo releases including a digital capture device for capturing an original image having at least one individual ([0032]), a device for producing a representative image of said captured original image (digital image file, [0033]) a display device for displaying said representative image ([0034]) and for displaying a release associated with said at least one individual and said representative image ([0040]) and an input device associated

with said display device for receiving an authorization signature by said at least one individual with respect to said photo release (signature pad, [0040]). Steensma discloses t using a digital camera ([0032]) but does not disclose including a screen in the camera or highlighting specific images. Anderson discloses a digital camera with a built in screen and a convenient user interface (column 5 lines 2-12). It would have been obvious for one of ordinary skill in the art to use the digital camera of Anderson to display pictures and picture properties stored in the database in the system of Steensma (Fig 8a) for the stated motivation of Anderson of increasing the ease of use and operation of the digital camera (column 2 lines 14-17).

With regard to claims 3 and 11, Steensma discloses information is associated with the original image ([0040]).

With regard to claim 4 Steensma discloses the image is stored in a database ([0041]).

With regard to claim 6 Steensma discloses associating all the images with one individual ([0043]).

With regard to claims 7, 8, and 13, Steensma discloses the system of claim 1 as outlined above, but does not disclose using digital watermarks to prevent modification of images once a signature is obtained. The examiner takes official notice that it is well known in the art to use digital watermarks to prevent modification of digital data. Further the examiner takes official notice that it is well known in the art to prevent modification of an item after it has been signed. The official notice is supported by Dziewit, USPN 4,981,370, (column 8 lines 39-43), which prevents against unnoticed modification as

well. It would have been obvious for one of ordinary skill in the art to use a digital watermark to protect the signed photo of Steensma, for the motivation of preventing misuse of signatures.

### ***Response to Arguments***

6. Applicant's arguments filed 31 January 2008 have been fully considered but they are not persuasive.

Applicant argues that Steensma in view of Anderson does not teach highlighting one individual in a group photo. The claims do not specify that there has to be a group photo, but rather claims "at least one" individual, which does read on Steensma in view of Anderson. Further, even in a group photo, the claims don't specify that only one individual is highlighted, but rather that "at least one individual" is highlighted. This again reads on Steensma in view of Anderson, since the entire photo being highlighted is highlighting at least one individual.
